PROFESSIONAL SUMMARY

Native iOS Software Engineer with over 5 years of experience designing, building, and deploying secure, scalable, and high-performance mobile applications. Expert in Swift, SwiftUI, modular architectures, and Mobile DevOps. Proven track record of leading end-to-end product launches from scratch while driving measurable improvements in app stability, performance, and accessibility. Adept at collaborating in Agile environments to deliver customer-centric features that align engineering goals with business value

SKILLS

- **Languages:** Swift, Objective-C, Python
- **UI Frameworks:** UIKit, SwiftUI, AutoLayout, Core Animation
- **Architectures:** MVVM, VIPER, Clean Swift (Clean Architecture), The Composable Architecture (TCA)
- **Concurrency:** Combine, Swift Concurrency (async/await), GCD
- **Mobile Devops:** CI/CD (Github Actions, Jenkins, Fastlane), Integration and UI Testing, XCTest, Swift Testing
- **Networking:** RESTful APIs, GraphQL, gRPC, URLSession
- **Security:** Keychain, CryptKit, Secure Enclave, SSL Pinning
- **Performance:** Performance Profiling, Instruments, Memory Management
- **Tools & Platforms:** Xcode, Git, Github, Charles Proxy, A/B Testing, Debugging (LLDB), JIRA
- **Concepts:** SOLID, Modularisation, SDLC, Accessibility (WCAG), OAuth 2.0, Design Patterns

WORK EXPERIENCE

HSBC, Pune

May 2024 - Present

Software Engineer (iOS) - Payments

- **Designed and implemented** a modular **SwiftUI and UIKit architecture using TCA** and dependency injection; delivered an insurance portal for Singapore customers impacting 100,000+ users, establishing a scalable and highly available framework for future enterprise applications.
- Spearheaded the migration of legacy banking application from **RxSwift to Combine**, leveraging modern concurrency patterns to improve performance and reduce third-party dependencies.
- Collaborated with cross-functional teams (Insurance & Payments) **ensuring timely releases**, QA sign-offs, and compliance with **Apple's Human Interface Guidelines (HIG)**.
- Leveraged **Payments application domain knowledge** to build secure mobile features; integrated iOS clients with robust backend Java J2EE microservices via REST APIs while strictly protecting corporate intellectual property.
- Led **production issue triage** and **performance optimization**; actively participated in on-call rotations and scaled organization-level security and knowledge-sharing initiatives to mentor team members.
- Utilized **Claude AI** and other tools to accelerate the development of modular and reusable UI components, significantly improving code efficiency and maintaining high architectural standards.
- Drove technical excellence through detailed **code reviews**, **architectural validation**, and leading sessions on best practices.

Raja Software Labs, Pune

Apr 2021 - Apr 2024

Software Engineer (Offshore LinkedIn iOS Application)

- **Developed and maintained a large-scale LinkedIn iOS application** serving millions of users, ensuring high performance and reliability.
- Enhanced application accessibility aligning with WCAG standards and Apple HIG guidelines.
- **Implemented face recognition and DigiLocker verification** features, improving onboarding security and user experience.
- Developed and optimized unit tests & UI tests (XCTest/XCUITest), ensuring high test coverage and code reliability.
- Optimized app performance by fixing memory leaks and reducing crash rates using Instruments and debugging tools.

PROJECTS

Portfolio Application - [Github link](#)

An iOS App to display the stock price using MVVM + Coordinator architecture

- Built an iOS app for stock portfolio tracking using Swift, MVVM + Coordinator architecture, and RESTful APIs.
- Features include profit/loss calculation, real-time stock price updates, and expandable UI for performance summary.

NewsFeed Application - [Github Link](#)

An iOS App to display the news feed using MVVM architecture

- Built a UIKit-based iOS news app using Swift, Combine, and layered MVVM-style architecture.
- Implemented category-based headlines, article search, bookmarks with Core Data, image caching, and offline article fallback using local cache storage.
- Focused on modular design, reusable UI components, and responsive state-driven updates for scalability and maintainability.

EDUCATION

Pune Vidyarthi Griha's College of Engineering and Technology, Pune

2017 - 2021

Bachelor of Engineering(Computer Engineering) | CGPA:8.63 /10.0

CERTIFICATIONS & RECOGNITIONS

- **Secure Code Warrior** (Secure best practices for IOS) (White and Orange belt)
- Recipient of **Pat on the Back Award** and **Circle of excellence award** at HSBC

CODING PROFILE

- [Leetcode](#)
